

Your patients protect their skin.
Help protect their eyes.

Many patients are unaware of the long-term implications that may be associated with cumulative day-to-day ultraviolet (UV) exposure to eye health.¹

UV-blocking contact lenses worn in addition to sunglasses and a wide-brim hat can provide an additional layer of protection against UV radiation.²

**Educate your patients about
ACUVUE[®] Brand Contact Lenses—
the only major brand to block
at least 97% of UVB and 81% of
UVA rays as standard across the
entire line.*†**

To learn more, visit
acuvueprofessional.com.

*UV-blocking percentages are based on an average across the wavelength spectrum.

†Helps protect against transmission of harmful UV radiation to the cornea and into the eye.

WARNING: UV-absorbing contact lenses are NOT substitutes for protective UV-absorbing eyewear such as UV-absorbing goggles or sunglasses, because they do not completely cover the eye and surrounding area. You should continue to use UV-absorbing eyewear as directed. **NOTE:** Long-term exposure to UV radiation is one of the risk factors associated with cataracts. Exposure is based on a number of factors such as environmental conditions (altitude, geography, cloud cover) and personal factors (extent and nature of outdoor activities). UV-blocking contact lenses help provide protection against harmful UV radiation. However, clinical studies have not been done to demonstrate that wearing UV-blocking contact lenses reduces the risk of developing cataracts or other eye disorders. Consult your eye care practitioner for more information.

ACUVUE[®] Brand Contact Lenses are indicated for vision correction. As with any contact lens, eye problems, including corneal ulcers, can develop. Some wearers may experience mild irritation, itching or discomfort. Lenses should not be prescribed if patients have any eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. Consult the package insert for complete information. Complete information is also available from VISTAKON[®] Division of Johnson & Johnson Vision Care, Inc., by calling 1-800-843-2020 or by visiting acuvueprofessional.com.
